

This mandate is harmful to innovation, and to freedom. It must not be passed... It puts fair use to rest, and it allows people who DON'T know better to control things that they don't TRULY understand. Passing this mandate, like many of the other Big Brother mandates that have been passed or made into law lately would be a further misconduct on the part of those people who are meant to serve us, the government. The Big Brother mandates of the past 2-5 years are further eroding the freedoms that many people died to win, and many more died to protect as the years have passed.

Have courage, and do the right thing.
